Office Action Summary

Art Unit: 1638

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a method of transforming a plant, classified in class 800, subclass 288, for example.
- II. Claims 1-9 and 13-16, drawn to a method of transforming a bacterium, classified in class 435, subclass 471, for example.
- III. Claims 1-9 and 13-16, drawn to a method of transforming a yeast, classified in class 435, subclass 254.11, for example.

Claims 1-9 and 13-16 will be examined to the extent that they read on the elected invention.

The inventions are distinct, each from the other because:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operations and different functions.

The methods of plant cell transformation and regeneration, and plant-expressible regulatory sequences of Group I, are not required by any other group. The methods of bacterial transformation, and bacterial regulatory sequences of Group II, are not required by any other group. The methods of yeast transformation, and yeast regulatory sequences of Group III, are not required by any other group. Each group results in physiologically and taxonomically divergent transformed products, which also require biochemically divergent culture conditions.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, classification, and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David T. Fox whose telephone number is (703) 308-0280. The examiner can normally be reached on Monday through Friday from 10:30AM to 7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson, can be reached on (703) 306-3218. The fax phone number for this Group is (703) 872-9306. The after final fax phone number is (703) 872-9307.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
